Designing Figures and Tables for Publication and Presentation

Scientists often summarize their key results in figures and tables, but how do you know you've effectively conveyed visual information to your reader or viewer? This Coffee Lecture focuses on little discussed elements of figure and table design, both from an information and a graphic arts perspective. Following a few simple rules can make your images more powerful and memorable for your audience. Learn them, and see both good and bad examples during this short talk.

Wednesday, 19.10.2022 13:00

Dr. Kali Tal, Research Support Service Team Medicine & Pharmacy, UB Bern

A tool that helps you work smarter, not harder: the PICO Portal

This coffee lecture will introduce you to the PICO Portal, a web-based tool designed to help you manage your research findings from conception to data extraction. This tool can be used in various disciplines/fields. Attendees will have the opportunity to preview some of its key features. Come discover a new tool for projects!

Wednesday, 26.10.2022 13:00

Tania Rivero, Research Support Service Team Medicine & Pharmacy, UB Bern

New NIH Data Management and Sharing policy and requirements

Under the 2023 Data Management and Sharing (DMS) policy, the National Institutes of Health (NIH) expects researchers to maximize the appropriate sharing of scientific data, taking into account legal, ethical, or technical issues that may limit the extent of data sharing and preservation. These changes are highly relevant to applicants who submit their applications on/after January 25, 2023. Would you like to learn more? Then feel free to join the Coffee Lecture.

Thursday, 03.11.2022 13:00

Dr. habil. Olga Churakova and Jennifer Morger, Open Science Team, UB Bern

Screen the records, save the world! – Citizen Science with Cochrane Crowd

You are interested in health-related topics? You would like to contribute to science, but don't know how? Then have a look at Cochrane Crowd – a free platform for health-related citizen science, where you can make a difference while learning about clinical research.

Tuesday, 15.11.2022 13:00
