Recherchieren mit Unterstützung von AI-Tools

The screenshot displays the ResearchRabbit interface, which is used for discovering and managing research papers. The interface is divided into several sections:

- Left Panel:** Contains navigation options like 'New Collection', 'New Category', and 'Connect to Zotero'. It also shows a list of collections, including 'Beispielsammlung' and 'Test', with various filters and options to add or remove papers.
- Center Panel:** Shows a list of papers under the heading 'Later Work'. The selected paper is 'Einsatz von Chatbots am digitalen Büroarbeitsplatz – Potenzielle Wirkungen und Handlungsempfehlungen für erfolgreiche Chatbotvorhaben' by Raphael Meyer von Wolff and Matthias Schumann (2022). Below the list is a network graph showing connections between the collection and 40 papers, with nodes representing authors and papers.
- Right Panel:** Provides a detailed view of the selected paper, including its title, authors, publication details, and a summary of the content. The summary discusses the current state of chatbot research and its practical application in the workplace.

The screenshot displays the ResearchRabbit interface with several key components:

- Left Panel:** Navigation and filter options. A collection named 'Beispielsammlung' is selected, containing several papers related to digital workplaces and chatbot research.
- Center Panel:** A network graph showing connections between papers. Nodes represent papers, and edges represent citations or relationships. A central node is labeled 'Döring 2016'.
- Right Panel:** A list of 'All References' for the selected paper, showing a list of related works with filters for abstracts and comments.
- Bottom Panel:** Action buttons for 'Add Papers', 'Export Papers', and 'Shareable Link'.

The screenshot displays the IRIS.AI search interface. At the top, there are navigation buttons for 'EXPLORING' and 'FOCUSING'. The search query is 'What Signals Do Employers Use When Hiring? Evidence from a Survey Experiment in the Apprenticeship Market'. Below the query, it states 'I've identified 175 related papers from our repositories and grouped them by concept.' The main area shows a semantic map with various concepts and their relationships. A detailed view of a paper is shown in the foreground, including the title, authors, abstract, and details.

Abstract

As the effects of the economic re-structuring through the financial crisis are hitting the European labour market, the NEET category turns problematic and too wide to be a useful tool of analysis and social policy planning, a return to its original and limited meaning is envisaged. Disentangling this category can help us to understand why it is no longer a useful tool and to identify new strategies for analysing youth labour vulnerability and possible resources for building more resilient and inclusive labour markets. In the first part of the paper we assess the origin of the NEET label in the European Union as a category emerging from a widening concern about youth unemployment and social exclusion. Then we focus on different statuses and meanings lying behind this category in the Italian case, in order to show the multiple challenges that a growing number of young underemployed or inactive can pose to social integration and labour market resilience. The third step is to examine the current labour policies that target youth unemployment and inactivity. Beside educational and social policies the new policies adopted by Italy in this field are the development of apprenticeship and internship. The first has a long history but it was recently reshaped trying to follow the model of the German dual system. The second was legally introduced by the end of 90's and had a widespread use on the labour market without positive effects on the resilience of youth. Nevertheless it was widely used by the European program of Youth Guarantee. Our analysis draws on Eurostat and national statistic data and on 25 interviews to Italian policy makers and experts.

| | |
|----------------|--|
| Quellen | Semantic scholar |
| Kosten | \$10 pro Monat+ev. Zusatzkredits, Gratiskonto mit 5000 «Credits» (ca. 120 «credits» pro Suche) |
| Positiv | Einfache Bedienung, kurze Inhaltsangaben |
| Negativ | beschränkte Gratismöglichkeiten, um Suchen zu optimieren und kein Export |

The image displays two screenshots of the Elicit web application. The top screenshot shows the 'Explore the scientific literature' interface with a search bar and options to 'Find papers', 'Extract data from PDFs', and 'List of concepts'. The bottom screenshot shows search results for the query 'How does the proportion of women in management influence the career advancement of female employees?'. The results are presented in a table with columns for 'Paper' and 'Abstract summary'. The workflow history on the left side of the interface lists previous searches related to technical education and performance.

Tools für Recherche und wissenschaftliches Schreiben

mimir-mentor

[Kurzes Einführungsvideo](#)

| | |
|----------------|--|
| Quellen | Semantic scholar |
| Kosten | Gratiskonto mit monatlich beschränktem «Kredit», sonst €17-104/Monat |
| Positiv | Übersichtlich und einfach zu bedienen, vielseitige Funktionen, ganzheitliche Arbeitsumgebung (Recherche und Schreiben) |
| Negativ | Limitierte Werkzeuge und wenig Kredit im Gratisangebot |

The screenshot shows the 'Literatur' tab in the Mimir interface. It features a search bar at the top and a table of literature entries. The table has columns for 'Autoren', 'Titel', 'Jahr', and 'Fachzeitschrift'. Several entries are checked, indicating they have been selected for review or citation. Each entry has an 'Online öffnen' button next to it.

This screenshot shows the search results for the query 'how does gender influence the choice of profession among young'. The results are categorized into 'Am meisten zitierte Veröffentlichungen' (Most cited publications), 'Aktuellste Veröffentlichungen' (Latest publications), and 'Weitere Veröffentlichungen' (Further publications). The top result is 'Does Exposure to Counterstereotypical Role Models Influence Girls' and Women's Gender Stereotypes and Career Choices? A Review of Social Psychological Research' by Olsson et al. (2018).

This screenshot shows a detailed view of a selected literature entry. It displays the title, authors, year, and journal. Below this, there are options for citation management, including 'Zitieren' (Cite), 'Zusammenfassung' (Summary), 'Anforderung' (Request), and 'Literaturzettel' (Literature card). The interface also shows a 'Du hast ausgewählt' (You have selected) section with a list of citation styles.

This screenshot shows the 'Deine Stufe: Aufstrebender Gelehrter' (Your level: Rising Scholar) progress bar. It indicates that 4/8 tasks are completed. Below the progress bar, there are two tasks: 'Vollständigkeit' (Completeness) and 'Qualität' (Quality). The interface also shows a section for 'Du hast ausgewählt' (You have selected) with a list of tasks to be completed.

This screenshot shows a detailed view of a selected literature entry, similar to the previous screenshot. It displays the title, authors, year, and journal. Below this, there are options for citation management, including 'Zitieren' (Cite), 'Zusammenfassung' (Summary), 'Anforderung' (Request), and 'Literaturzettel' (Literature card). The interface also shows a 'Du hast ausgewählt' (You have selected) section with a list of citation styles.
