Dimensions – research data in one platform

What is Dimensions? And when do I use it?

Linda, Medical Doctor, is going to explain it.

What is Dimensions?

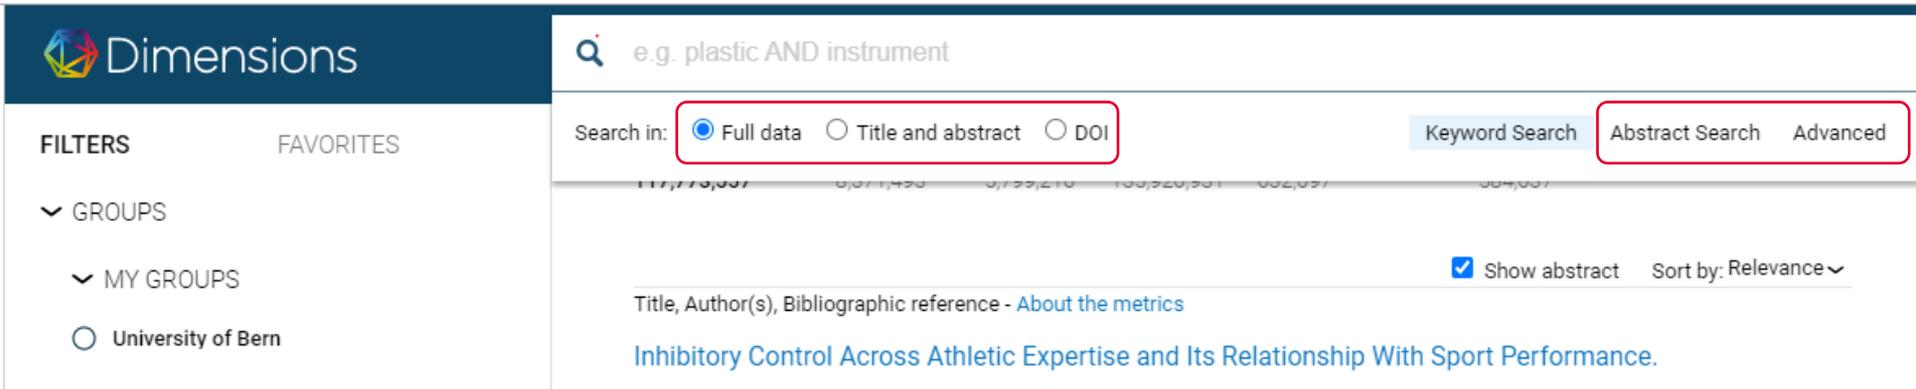

Research data in one platform

- Enriched and linked data in one platform
- Database for medicine and health science
- Database that guides researchers through the research process

How to search in Dimensions

(Quick AND dirty) OR „more systematic“

The screenshot shows the Dimensions search interface. The search bar contains the text "e.g. plastic AND instrument". Below the search bar, there are three radio buttons for search scope: "Full data" (selected), "Title and abstract", and "DOI". To the right of these are three buttons: "Keyword Search", "Abstract Search", and "Advanced". The "Keyword Search" button is highlighted in light blue. Below the search bar, there are several search results, including one titled "Inhibitory Control Across Athletic Expertise and Its Relationship With Sport Performance". The interface also includes a sidebar with "FILTERS" and "FAVORITES" sections, and a "Show abstract" checkbox.

Keyword search

For preliminary search
(quick & dirty)

Abstract search

Enter a whole abstract,
get analysis, and
related results

Advanced search

Combine keywords and
inspiring concepts with
AND, OR etc.
