Your guide to article licensing as a Read & Publish author

Direct the flow of open access research at your institution

rsc.li/randp
Manuscript accepted? Congratulations!

It is now time to choose your article licence. Corresponding authors from this institution can make articles gold open access at no cost, because your institution has already paid the article processing charge.

To take advantage of this, click the link in your acceptance email and follow these steps:

Step one: go online

Your link will take you to this web page.

Your name should be listed as the corresponding author.

Scroll to the bottom and press start now.

Click the "Start Now" button to choose a publication route and sign your licence to publish.
Step two: pick your route

Our system will automatically identify you as being from a Read & Publish institution based on your email address.

Select gold open access and press continue.
What happens if I select standard publication?

If you pick standard instead of gold open access, you can continue, but bear in mind that your article will only be accessible to readers who subscribe to your chosen journal.

Step three: sign your license

If you picked gold open access, you will only be shown relevant licence options.

Check the full terms of each licence.

Once you are happy, agree to your preferred option and press continue.
Step four: confirm your choices

Double-check that your publication route and licence are correct.

The payment box will confirm that all charges have been covered by your institution.

Press confirm and finish to complete the steps.

Unanswered questions?

If you have a question about any of the steps covered here, or a question related to our Read & Publish scheme, please don’t hesitate to ask.
